HYALUAL PEELS

CUSTOMIZED BLEND OF CLINICAL-GRADE ACIDS FOR EVERY SKIN CONDITIONS

HYALUAL PEELS line is composed of superficial peels with unique results-oriented formulations of clinical-grade acids that are customized to correct specific skin problem:

- **Advanced Resurfacing Peel** offers a complete approach to aging skin
- **Clarifying Peel** is specially designed for oily, mixed and acne-prone skin
- **Brightening Peel** is formulated to improve uneven skin tone and spots.
- **Glow Enhancing Peel** is intended to reverse dull skin and get a glowing complexion.

The synergistic effect of the various acids allows to obtain immediate and multifunctional results without long downtime period.

PROCEDURE

Prepare the skin before the peel.

The skin should be washed with soap and degreased with alcohol. This process will eliminate the oils on the skin's surface which will stop the chemical peels penetration.

Apply the peeling solution.

The most convenient way to use special brush applicator. Avoid the areas around the eyes and lips.

Rinse off

After the set exposure time (1-4 min.) is over, rinse peel off with water. No additional neutralization is necessary.

- Depth of chemical exfoliation: superficial.
- Time of exposure: 1-4 minutes.
- Course of procedures: 1-6 procedures with the interval between the procedures at least 7-14 days.
- Periodicity: 2 courses per year.

KEY BENEFITS

• INNOVATIVE WORK WITH FORMULATION

Hyalual peels have unique results-oriented formulations using clinical-grade and highly beneficial acids and concentrations that are customized to correct problematic skin conditions such as aging, acne, hyperpigmentation and dullness.

• IMMEDIATE AND TRANSFORMATIVE RESULTS

The synergistic effect of the various components allows to obtain the maximum therapeutic effect: enhanced action on the main problem and the correction of associated imperfections.

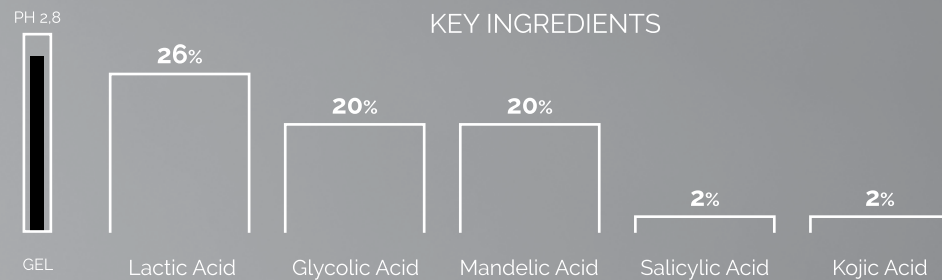

• NO DOWN-TIME PERIOD

Great results with low skin trauma and minimum downtime period (skin rehabilitation takes a maximum of 2 hours) allow to increase the loyalty of patients.

• EASY APPLICATION

Simple protocol procedure, the optimal rheological properties and high safety profile provide high ergonomic use of the products.

ADVANCED RESURFACING PEEL

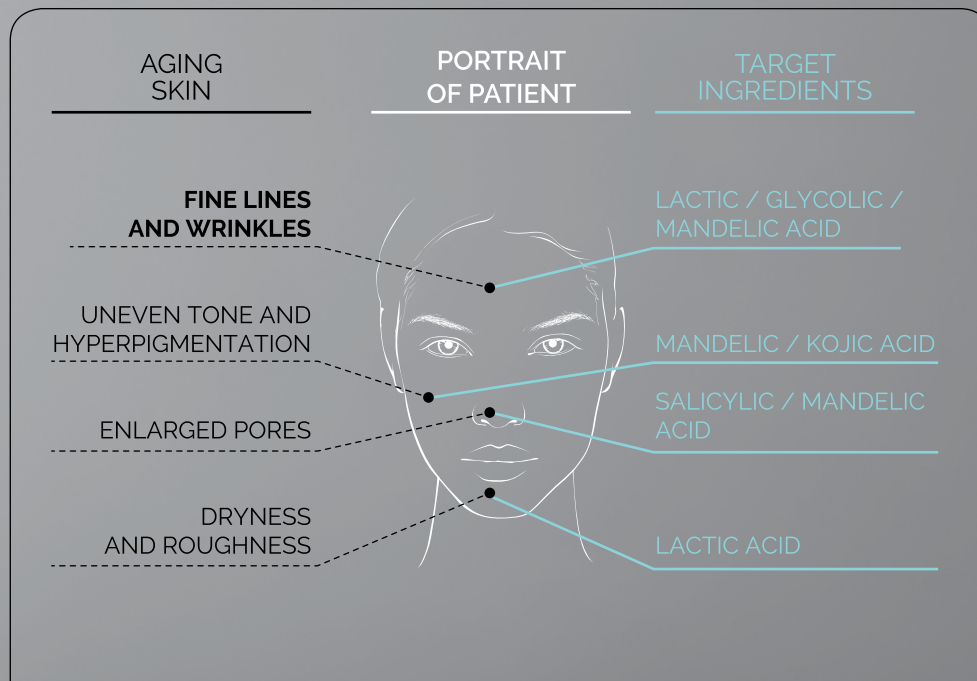

CLINICAL RESULTS:
Severity of superficial wrinkles is lower by **61%**

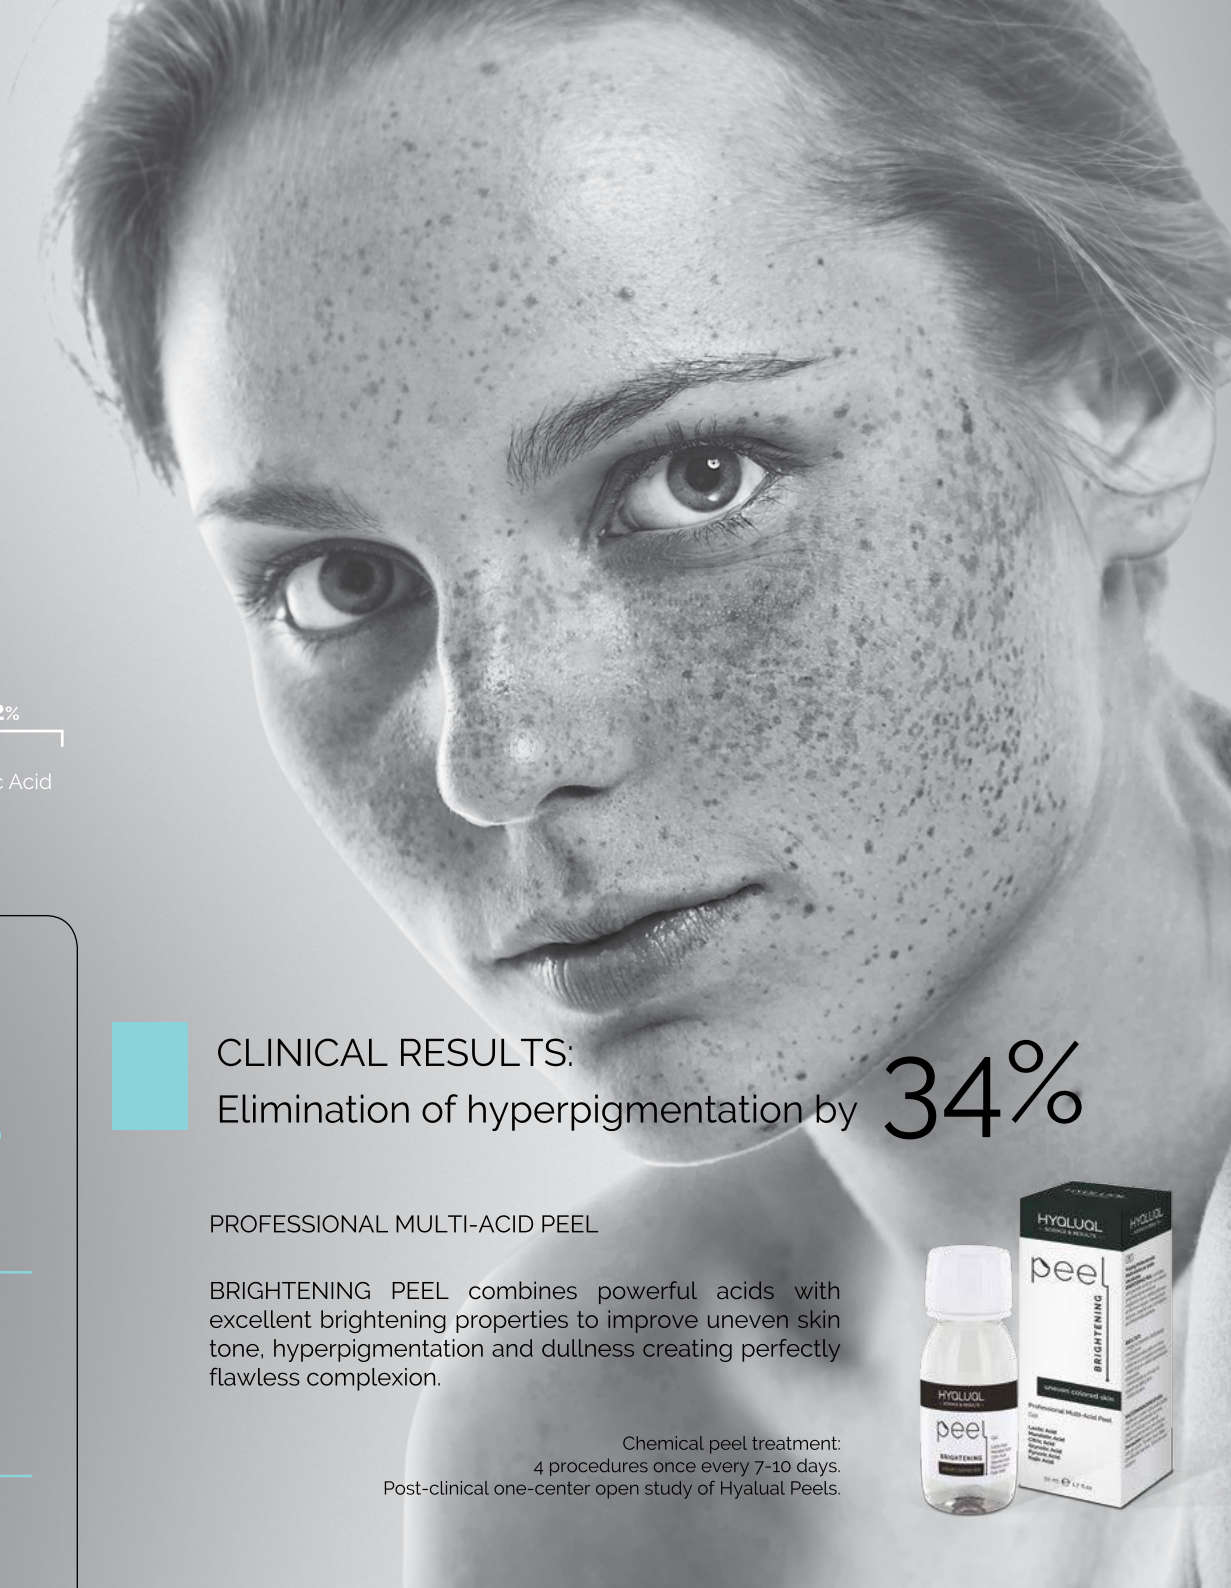

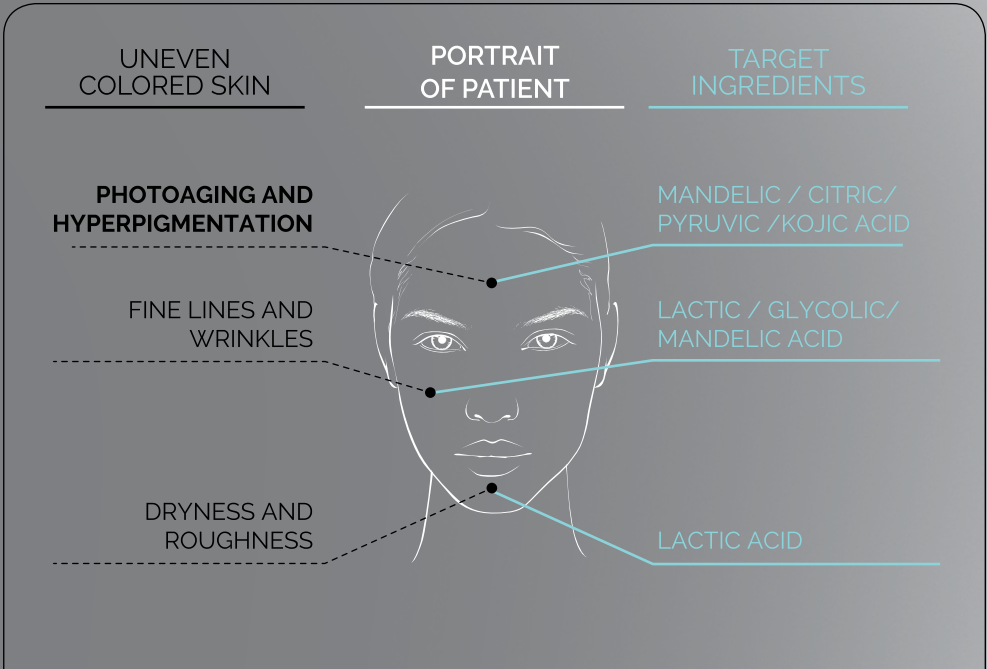

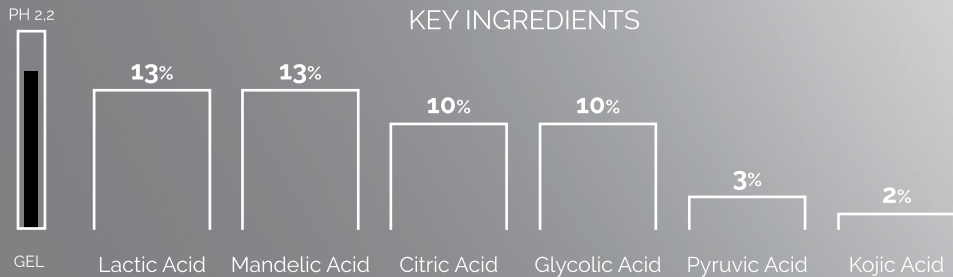

PROFESSIONAL MULTI-ACID PEEL

ADVANCED RESURFACING PEEL is formulated with an impressive list of high-performance acids to correct visible signs of aging. It helps improve the appearance of several skin concerns, including fine lines and wrinkles, uneven skin tone, rough texture and dull complexion.

Chemical peel treatment:
4 procedures once every 7-10 days.
Post-clinical one-center open study of Hyaluual Peels.

BRIGHTENING PEEL

CLINICAL RESULTS:
Elimination of hyperpigmentation by **34%**

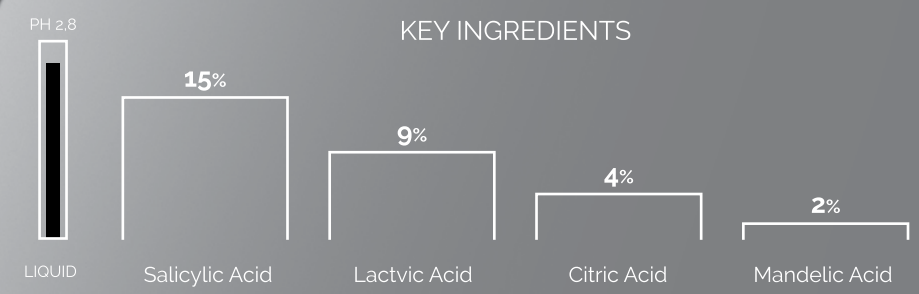

PROFESSIONAL MULTI-ACID PEEL

BRIGHTENING PEEL combines powerful acids with excellent brightening properties to improve uneven skin tone, hyperpigmentation and dullness creating perfectly flawless complexion.

Chemical peel treatment:
4 procedures once every 7-10 days.
Post-clinical one-center open study of Hyalual Peels.

CLARIFYING PEEL

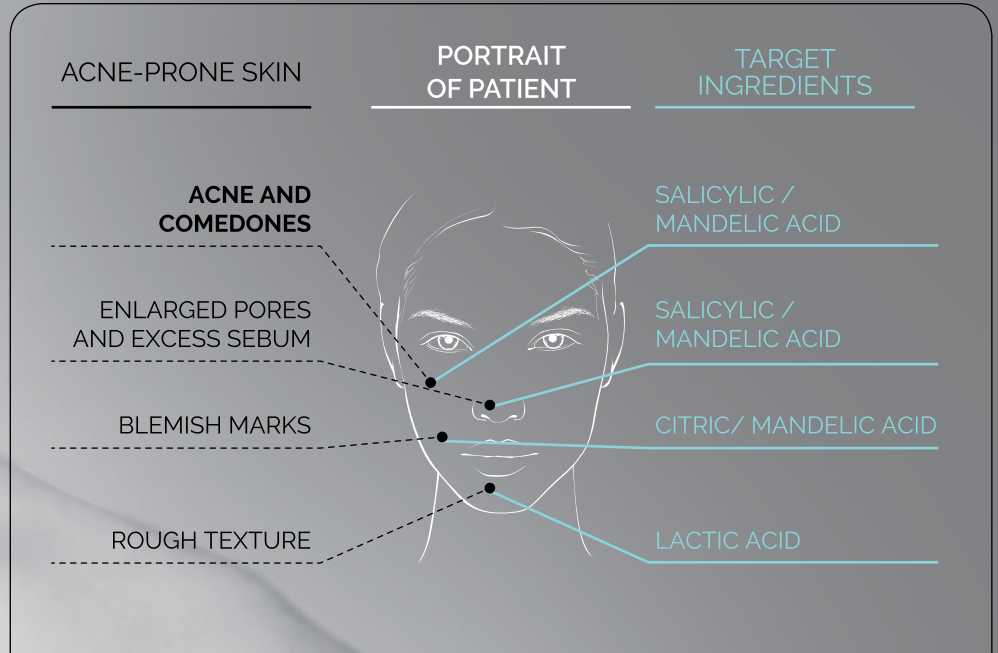

CLINICAL RESULTS: Reduction of pores by **63%**

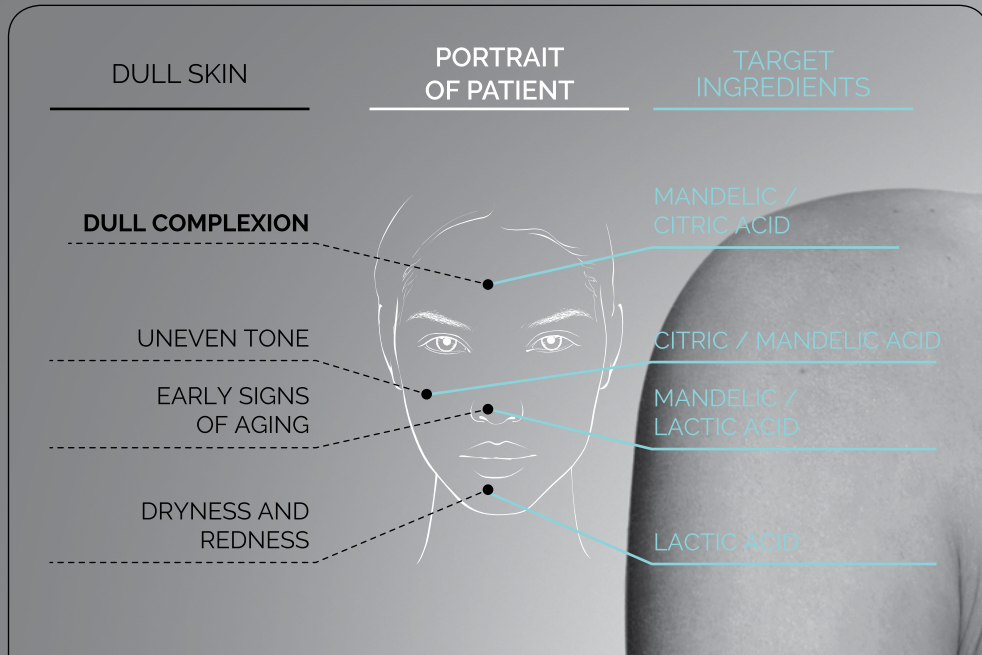

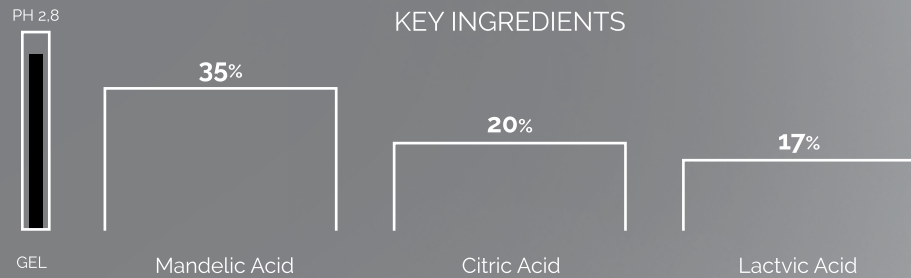

PROFESSIONAL MULTI-ACID PEEL

CLARIFYING PEEL is specially designed for oily, mixed and acne-prone skin. Formulated with an acid blend including salicylic acid, this peel clarifies the skin, reduces excess sebum and refines the appearance of pores and skin imperfections.

Chemical peel treatment:
4 procedures once every 7-10 days.
Post-clinical one-center open study of Hyalual Peels.

GLOW ENHANCING PEEL

CLINICAL RESULTS:
Improvement of skin texture by **52%**

PROFESSIONAL MULTI-ACID PEEL

GLOW ENHANCING PEEL is formulated with a combination of mandelic, lactic and citric acids to visibly improve the appearance of dullness, rough texture, uneven skin tone and to promote a glowing revitalized complexion.

Chemical peel treatment:
4 procedures once every 7-10 days.
Post-clinical one-center open study of Hyaluual Peels.
