PROFI DELUX

POST PROCEDURE CARE SPRAY

Professional care specially designed for reactive, post-procedural skin to provide immediate relief and protection after the invasive aesthetic treatment.

Hyaluronic acid promotes **long-lasting moisture and anti-inflammatory protection** while **succinic acid** **strengthens the blood vessels, counteracts free radicals, and optimizes the healing process.**

RESULTS:

- Immediately soothes the skin
- Visibly calms redness and improves complexion
- Reduces burning, tightness and discomfort
- Protects compromised skin and helps prevent infection
- Locks in moisture to prevent dehydration
- Provides an instant refreshing sensation

Ingredients: Water (Aqua), Carbon Dioxide, Sodium Hyaluronate, Succinic Acid, Sodium Succinate

Volume: 50 mL, 150 mL

LASER HAIR REMOVAL

PROFI DELUX

THE SPRAY FORM PROVIDES A NON-CONTACT METHOD OF APPLICATION, WHICH ALLOWS:

1

To avoid contact with skin – to reduce the chances of developing a skin infection and pain from touch, which is very important in treating damaged skin.

2

Not to overload the skin. Light texture is quickly absorbed allowing the skin to breathe and promotes natural skin renewal during the recovery time.

3

To give ultra-rapid application. A superior spray-dispensing system makes the application extremely easy and pleasant.

HOW TO USE PROFI DELUX

Apply the spray for 3 seconds at a distance of 25-35 cm from the skin surface immediately upon procedure completion. Reapply 3-4 times after previous dose has absorbed.

AT HOME POST PROCEDURE CARE:

after injection procedures – 5 times a day for 3 days

after laser hair removal – 4 times a day for 3 days

after chemical peels – 3 times a day for 3 days

after fractional photothermolysis – from the 1st to the 3rd day - 4 times, from 4th to 10th - 2 times a day
